

FIRE DETECTION & EXTINGUISHING SYSTEMS

SAVAL

THE FIRE PROTECTION SPECIALISTS

Saval started manufacturing extinguishers back in 1925 and is still a leading company for fire fighting equipment such as: fire detection and fire suppression combined in total integrated fire control and management systems.

*Constant care for quality and reliability of the products is a main company rule.
ISO 9001 and AQAP 4 certifications are proof of this philosophy.*

*Saval is constantly involved in various aspects of security, environmental and economy.
Never ending changes in points of view keeps our design and research teams up to date.*

Due to flexibility, trained skills and a willingly ear in listening to the demands out of the field makes Saval a very good business partner for all kinds of Fire & Gas projects.

Saval is one of the leading fire fighting and detection company's who are specialized in Petro-chemical plants, refineries, on-shore, off-shore and industrial locations.

80 YEAR, IN SERVICE FOR YOUR SAFETY

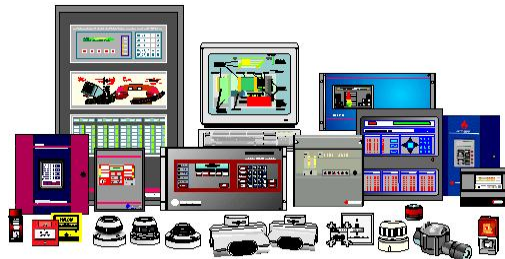

the fire protection specialists: a safe feeling

FIRE DETECTION & EXTINGUISHING SYSTEMS

SAVAL

THE FIRE PROTECTION SPECIALISTS

- Deluge systems
- Watermist systems
- Gaseous systems
 - FM-200
 - CFI
 - Inert
- Dry powder systems
- Smoke & Heat detection systems
 - Conventional technique
 - Addressable technique
- Flame detection systems
 - UV technique
 - IR technique
 - UV/IR technique
- Gas detection systems
 - Combustible gas detection
 - Toxic gas detection
 - Asphyxiant gas detection
 - Catalytic technique
 - IR technique
 - Electro chemical technique
- Flameproof / Explosionproof / Intrinsic safe approved equipment
- Portable fire extinguishers
- Wheeled fire extinguishers

Saval fire detection and extinguishing systems offer the best protection for high value assets such as: Control rooms, operator rooms, computer rooms, petro-chemical plants, refineries, on-shore, off-shore applications, machinery spaces, cable voids, telecommunication rooms, office buildings, warehousing, archives, etc.
